Supported Living for Adults with Mental Health conditions, Learning Disabilities and/or Autism

Supporting Choice, Equality and Independence through our values and empowerment programs with the goal of improving quality of life of people we support

About Us

Lumina living care is a supported living service for adults, aged 18–65 years who have learning disabilities, autism, and/or mental health conditions and those who present with behaviours that may challenge and do not need to be managed as hospital in patients. We recognise the difficulties and challenges our potential clients may face finding their own homes and managing their activities of daily living, therefore we provide services that enable them have their own choice and control over their lives, live happy and fulfilling lives by providing them with their own tenancy and care agreements. This also enables them to develop life skills, achieve optimum independence and long term self management. We provide our care in an environment where people can feel at home, which allows our service users to have more choice about the type of care they receive and maintain close relationships with friends, family and loved ones.

We believe all people can reach their full potential

irrespective of their mental health, disability, socioeconomic background or physical environments.

Our service provides support to prevent hospital admissions for service users that are at risk of developing crisis or having escalation of symptoms. We also provide home and community support for service users being discharged from hospital.

We aim to improve the quality of life of all our service users through general wellbeing and wellness programs promoting holistic approaches which include physical (exercise and sports) and emotional wellbeing.

Our mission is to stay committed to providing high quality care and support with respect and dignity to all our service users. We take equality and diversity seriously and accept all adults who have mental health conditions, learning disabilities and autism from various cultural, sexual orientation, religious, and ethnic background.

Our Services

Our packages of support and care are completely bespoke, delivered as person centred care and perfectly matched to the unique goals, needs, preferences and aspirations of each individual. To achieve this result-based service aimed at recovery, independence and long-term solutions, we make use of varieties of evidence-based therapies and support such as cognitive behavioural therapy,

physiotherapy, occupational therapy, speech and language therapy, positive behaviour support and so on. These will be achievable directly through our service and working in partnership with mainstream services and provided according to individual service user care plan. What makes our services unique is the combination with the Lumina Wellness, Exercise and Sports Therapy Pathway.

Our Unique Therapeutic Program

The Lumina Wellness, Exercise and Sports Therapy Pathway

We have developed this pathway as a means to holistic therapeutic approach to general well being of our service users, providing proactive prevention and intervention programs where they can easily eventually measure or evaluate their lives as a whole.

We encourage our service users to identify their needs where there will then be active intentions/ actions of drawing out activities, lifestyles and making choices that will significantly influence their physical, mental/intellectual, social, emotional, spiritual, financial, vocational and environmental well being to optimal levels.

Specific actions will be taken to work on each individual needs taking into consideration each dimensions of the well being program as listed above, exercise and sports will be a unique program which we expect to cut across all service users as they wish to participate.

Regular exercise has been found to have profound positive effect on anxiety, depression, ADHD, relieving stress boosting sleep and overall mood and improving memory. Exercise and Sports can be a good distraction from many negative thoughts that feed mental health.

Our service users in wheelchair or with mobility problems can also benefit from regular physiotherapy, exercise and sports sessions to improve blood circulation, movement and their general health.

Each Service user has a care plan which identifies areas of development and staff will help them set SMART goals to achieve them with regular reviews.

HEALTH & WELLNESS THERAPIES, PREVENTION, REHABILITATION AND RECOVERY

At Lumina Living Care, we provide therapeutic programs which our Service Users can choose to attend. The aim of the different modalities of therapies that we provide are to defeat the patterns of mental ill health and also to support service users with learning disabilities and autism to become more independent and be able to self-manage. Their underlying issues are addressed which enables the individual to learn new healthy prosperous patterns of behaviours and habits, as well as how they see themselves in the world and how to relate to themselves and others around them.

These programs also maintain or improve physical or mobility problems as required. Our approach is holistic, yet systematic for long term recovery and rehabilitation. We provide quick and easy access to expert treatment, with flexible consulting hours to fit around our service users needs. We offer a wide range of confidential therapies, including Cognitive Behavioural Therapy (CBT), counselling, occupational Therapy (OT), physiotherapy, Art therapies and more in-depth therapy approaches. These are provided on a one on one and group basis.

Each Service User has an initial consultation that enables our expert team and mainstream team where applicable to understand the challenges that each individual faces, and to recommend and deliver what they think will help most.

Our therapies deal with the whole person, physical, mental/intellectual, social, emotional, spiritual, financial, vocational and environmental well-being to optimal levels. We offer individual and group therapy sessions.

The Team Approach

It is vital that all teams function well together. The concept of team incorporates therapists, counsellors, support workers, dieticians, family members and carers. Each client will have a key worker who is responsible for coordinating their care and with whom they can build a firm professional relationship.

We seek the help of mainstream services as required including input from GP's, other medical professionals, physiotherapists, occupational therapists, speech and language therapists, dieticians, social workers, chiropodists, opticians, nurses, psychiatrists and other specialists. By having these close working partnerships in place, each individual receives the required support to meet all of their needs.

Our staff teams are highly trained and experienced in supporting our service users. They are sensitive to service user needs and are determined on providing the best service to improve people's health and wellbeing, with focus on achieving positive outcomes.

EXPECTED OUTCOMES

Key Focus areas include

Managing mental health, managing physical health, self love and care, self respect, self esteem, living skills, healthy relationships, creating and maintaining boundaries, responsibility, identity, education and employment

Key outcomes include:

Personal and social development: through which our residents develop social and emotional capabilities, including determination, self-control, persistence and self-motivation.

Social and emotional capabilities: soft skills or non-cognitive skills, communication, creativity, self confidence, managing feelings, problem solving, leadership skills, resilience and self esteem.

Being Healthy: Psycho-education, Cognitive Behavioural Therapy, dietetic education, meal planning and preparation, self regulating and behavioural skills and changing thought patterns.

Physical Well being: maintain and improve mobility or reduce physical disability effects, physiotherapy, exercise, sports, deliberately moving and active lifestyle. Enhances stress reduction, depression and release happy hormones.

Developing social, communication, and team working skills: the ability to learn from experience, control behaviours, and make good choices.

Developing the self-esteem, resilience, and motivation to persist towards goals and overcome setbacks.

Educational development and achievement/ career success: Participation in training, literacy and numeracy, community courses, and activities, taking advice on services to improve education, budgeting and tenancy support.

Positive relationships: Those which can also be measured and valued by other people, accessing public services, local communities, and family networks. Having positive relationships, involvement in meaningful, enjoyable activities.

The skills required to achieve these goals will be developed and nurtured during one to one and key worker sessions. We also work with external services and organisations who are able to provide further support such as therapy with the overall aims being rehabilitation, prevention of deterioration and improved quality of life.

Our Values

- 🔧 Providing high quality care and support for our service users
- 🔧 Respect the rights of our service users and all members of the multidisciplinary team
- 🔧 Commitment to providing safe care and support through prevention, rehabilitation and recovery to achieve maximum independence
- 🔧 Ensuring equality
- 🔧 Enabling socialisation with the help of support groups
- 🔧 Accountability for every aspect of our service

Steps we take to achieve our aims and objectives

- 🔧 Ensuring all the clinical governance actions are undertaken: service audits, staff appraisals, care provision reviews, service and customer feedback.
- 🔧 Treating service users with respect and dignity.
- 🔧 Ensuring service users are fully involved with their own care including decision making.
- 🔧 Encouraging service users to be socially interactive and have positive relationship within the home, family and the community.
- 🔧 Ensuring prompt and effective assessment of referrals for appropriate matching with the service and existing service users.
- 🔧 Encouraging service users to embrace and develop their hobbies and interests.
- 🔧 Encouraging service users to develop skills that will improve their independence including academic pursuit, vocational training up to a career level if they choose to.
- 🔧 Meetings with each service user to work on their personal plans, goals and aspirations through care planning and review systems.
- 🔧 Ensuring service user plans and care are done in partnership with placement officers and others involved.
- 🔧 Ensuring regular education on health promotion programs such as healthy eating and exercises
- 🔧 Promoting group activities to further improve confidence and social interaction.
- 🔧 Promoting service user social interaction with family and friends.
- 🔧 Using outcome measures for monitoring
- 🔧 Working closely with the borough safeguarding team
- 🔧 Providing accountability to service user while using the individual service fund (ISF).

Person centered care

Our promise is to ensure that our care is personalised:

- ⌘ Each service user will have a progressive care agreement plan tailored to their individual needs
- ⌘ Key work sessions / one to one discussion readily linked back to care planning targets and outcomes.
- ⌘ Each service user will have copies of easy read tenancy agreement
- ⌘ We will support each person to understand, maintain and implement the tenancy agreement and involve their families where necessary.
- ⌘ We will provide 24 hours of high-quality care, support and supervision to each service user according to their individual needs.
- ⌘ We will encourage choice and control regarding how health and care needs are met.
- ⌘ We will promote access to care and support from mainstream services and access to specialist health, social care and medical support including health checks.
- ⌘ We will work together with each service user in partnership with their parents or carers, the placing authority, and any other significant persons in their lives. This includes helping to build positive relationship, promoting and facilitating contact between adults, parents, carers, siblings and any other significant service user. Where appropriate, we will re-build and maintain relationships with family members and friends
- ⌘ We will offer and arrange, as appropriate, individual therapeutic work to address identified psychological and family relationship difficulties, mental health difficulties, learning disabilities and autism services and improve service used and social functioning.
- ⌘ We will help reduce emotional and psychological distress and provide intervention and support to those with mental health/self-harming and challenging behaviours.
- ⌘ We will help minimise risk of self-harm and harm to others through effective risk assessment and risk management.
- ⌘ We will provide positive and rewarding daily life experiences, with opportunities to have fun and enjoy life.
- ⌘ We will encourage and enable each service user to find and use relevant educational and vocational training opportunities.
- ⌘ We will develop age-appropriate self-care skills, including money management, shopping, cooking, use of public transport, and community living and social skills.

Our mental health, learning disability and autism services

The range of services we offer for individual needs include:

- ✚ A progression care pathway that fulfils each individual's optimum potential
- ✚ A safe environment with innovative support programs
- ✚ **Transition opportunities**- this includes a clear step down service from hospital or in-patient care to supported living and their own homes
- ✚ Crisis Escalation prevention
- ✚ Support in accessing education and paid employment prospects
- ✚ Multidisciplinary team support and assistance
- ✚ Choices for the people we support that encompass each individual's needs to achieve positive outcomes and make a transition to more independent living
- ✚ We offer holistic approach to support which includes **Positive Behaviour Support program**.
- ✚ **Respite and day services** - We would refer adequately for specialist respite and day services which offer bespoke support and enablement for individuals who, in addition to their learning disability, have additional support needs associated with autism, challenging behaviour, complex health needs or additional disabilities.

Communication

We understand the communication difficulties that may arise with adults with learning disabilities which may affect their choice and control, therefore we use accessible language, avoid jargon or long words, follow the lead of the service user while communicating, going at their pace, being creative and checking for understanding. We also use different communication tools including Makaton.

Our criteria

Men and Women aged between eighteen (18) and sixty five (65).

Adults with learning disabilities and /or autism with or without physical disabilities

Adults with behaviours that may challenge or with complex needs

Adults who are entitled to section 117 after-care who are under what is known as the Care Programme Approach (CPA), continuing care and informal patients.

Have complex mental disorders as the primary support need, with comorbid difficulties such as but not limited to Attachment Disorder, Atypical Depression, Obsessive Compulsive Disorder, Bipolar Disorder, Personality Disorder, Depression, Schizophrenia, Eating Disorders and a range of other disorders

Men and women involved with the criminal justice system and or leaving prisons, with mental health conditions which are linked to offending or seriously irresponsible behaviour.

A history of long-term hospitalisation, a number of admissions to hospital or at risk of becoming institutionalised.

Currently residing in a time limited service for people with mental health support needs.

Medication support needs, promoting the safe and effective use of medicines and ensuring that suitable and high quality care is provided to service users.

Financial support needs, paying bills, shopping, budgeting, money management and accessing benefits including direct payments and personal budgets.

Activities of daily living support needs.

The individual agrees to continuing a programme of rehabilitation within a Supported Living setting.

Each person must have a named care coordinator from a Community Mental Health Team or Outreach Team and written care plan under CPA.

Covid 19

COVID-19 pandemic has had a detrimental impact on the mental health and wellbeing of people who have been severely impacted by this crisis. People worldwide were forced into isolation causing PTSD, Anxiety, Depression and Stress.

Our supported living service prioritises individuals who have been directly affected and they will be admitted urgently.

Accommodation

The Supported Living Service recognises that prospective tenants should have the opportunity to choose a home, which suits their needs. All homes are single sex with a mixture of ensuite and shared bathrooms, all close to local transport links and local amenities. Our evidence based framework is a planned pathway to increase independence, self management of their mental, physical health and well being. Our aim is to support their recovery in the community to sustain their own tenancies. Each home is newly decorated, well equipped and the resources

are continually reviewed and expanded to maintain a high standard. Each room is thoughtfully decorated and furnished and this includes a wardrobe, chest of draws, bed and chair. There is a communal dining room providing a comfortable environment for that important interaction around mealtimes. There is a main lounge and garden area for relaxing and socialising. The Supported Living Service provides a homely environment in order to challenge institutionalisation whilst promoting supportive structures and routines for our Service Users to live a high quality life.

Crisis Beds

We offer intensive, short-term support to help manage a mental health crisis within our homes (rather than in a hospital).

Overnight accommodation 2-5 day accommodation
- A small number of beds in a home-like environment with Intensive treatment

Referrals are to be made by The Local Crisis Team. You can call us on 07340454957 or email admin@luminalivingcare.co.uk

ASSESSMENT/ VISITING US

We encourage families, social workers, carers and individuals to visit our Supported Living Service following the assessment if we have an available placement. This will allow meeting and an informal chat with the manager and care staff. You will be able to look around and get a feel for if the placement would be right for the individual. If the outcome of the assessment is that the service can meet the needs of the potential Service User, they will then be invited to visit the property. This will give them the opportunity to look around, meet other Service Users in the property and ask questions or seek clarification about anything they are unsure of.

If the potential Service User likes the service, there is an appropriate vacancy for them and funding for their placement has been approved, a transition plan is then agreed with the individual and others involved in their care. This can include both day and overnight

visits to help the tenant settle into their new home. If there are no concerns from the tenant or the service during this transition period, an admission date into the tenancy is then agreed.

In the case of emergency admission requests, an initial assessment will be completed within 2 working days of referral. If the service can offer a suitable placement, and funding is confirmed, The Supported Living Service will inform the new Service User of all key aspects, procedures and routines of the property within two days of admission. Prior to admission, a review plan will be agreed with the potential tenant and their care team and contingency plan confirmed as to know what actions will be taken if the placement becomes unsustainable. The placement will be formally reviewed in the sixth week and a decision made on whether support can be continued.

FUNDING PLACEMENTS

Once the assessment and initial visit is complete and it's agreed that the placement will meet the individual's care needs, we will provide a costing to the commissioning authority to be reviewed by the funding panel. If agreed, the placement is confirmed.

Each local authority has their own eligibility criteria,

based on the national criteria outlined in the Care Act. They Complete a Care Needs Assessment (CNA) to discuss care and support needs and help maintain your well-being and independence.

The local authority confirms how it will meet the service user needs in a Care and Support Plan.

OUR PHILOSOPHY OF CARE

Lumina Living Care philosophy is based on the key "Principles of Good Adult Care", privacy, rights, choice, dignity, self-fulfilment, independence and safety.

We believe that service users should be treated as individuals with person-centred care planning in order to adequately meet their needs and aspirations. We believe that families and friends can be part of the important decision makers so that their beliefs and wishes are respected and valued.

We value diversity and equality, all people are respected and valued and none should be labelled or written off because of their behaviours, mental or physical state. Part of this is ensuring safety of our service users and environment and we would not tol-

erate threatening or dangerous behaviour. We take proactive approaches to combat such behaviours and would expect same of every organization we work with. We work closely with our service users with specific and suitable approaches for each individual based on their characteristics, strengths and interest.

Our staff at Lumina Living Care are well trained and experienced applying their learning and skills to deliver safe and high-quality care and support. They will be sensitive and respectful to each individual needs and will work proactively and positively to develop these individual qualities which enhance each service user growth and development.

Why Choose Our Supported Living Service

Our staff are trained healthcare professionals providing clinically led therapeutic care. We promote active daily living. Our staff ensure that our service users are safe, adequately cared for and supported throughout each day. We assist our service users to work on re-establishing healthy sleep and meal schedules, medication management, self care and hygiene, healthy recreational and social activities.

Our service users also take part in a wide range of rehabilitation services such as counseling, physical, spiritual, behavioural, psychosocial, dietary, physiotherapy, occupational therapy, vocational and psychoeducation sessions.

Our service users live on site within a co-living setting with 24 hour care and waking night staff.

Days are structured with therapeutic activities including individual and group therapy, medical support and outings.

We deliver the highest level of care appropriate for our service users with focus on safety to self and/or others, and those struggling to function in day to day life.
